music to balance your Life™

sequoia RECORDS

The #1 Lifestyle Music Source for 30 Years

2012 catalog

can a new form of music be discovered on a backpacking trip?

Dear Music Lover,

It was thirty years ago when we went to Sequoia National Park to unwind from our busy schedule as session players in Los Angeles. While hiking, we paused to listen to the sounds of nature around us. We felt a deep sense of peace from these nature sounds and we were inspired to help other stressed out city folks like us

experience it also. So we returned to make nature recordings, brought them back to our studio in LA and composed music for them. These were the first releases for our new record company, Sequoia Records.

This simple discovery on that backpacking trip was the seed that led our company, Sequoia Records, to become what it is today – the #1 lifestyle music label, with over 2 million albums sold, featuring some of the finest artists from around the world. We still offer music for relaxation and the healing arts just as we did at the start, except now we have expanded to include Native/World, Celtic, Chill/Lounge, Yoga Music, Sacred Chant, Trance Dance and much more.

We invite you to see for yourself how Sequoia music can relax you, inspire you, deepen your yoga, create the perfect ambiance for entertaining, move your body and renew your spirit. This catalog includes 10 life-enhancing new releases to balance your life. We hope that you will experience the same peace of mind we felt that day in Sequoia National Park 29 years ago.

Walk in balance,

David Gordon Steve Gordon

Lodestone Resonator

SENSORY ENGINEERING

LODESTONE RESONATOR

X304 CD/DVD \$15.98

Expand your mind and embark on an aural journey into deep inner space, propelled by the psychedelia-tinged electronic music trance grooves of Lodestone Resonator. Producers David & Steve Gordon (creators of the *Billboard*-charting *Buddha-Lounge* chill-out series) inspired by leftfield IDM downtempo groups such as Shpongle, Psychonauts, The Orb and Aphex Twin, have not created so much as unleashed an entirely new musical energy form consisting of the next evolution of ambient electronica and psychedelic trance. Sensory Engineering weaves hypnotic patterns of organic acoustic and pulsating electronics into a previously unheard synthesis of sound. You are transported far through the outer realms of mind into pure consciousness of being. Here you can expect only the unexpected as you are propelled beyond form into the heart of the unfathomable. You return from the journey with expanded perception, touched by beauty, wisdom and magic.

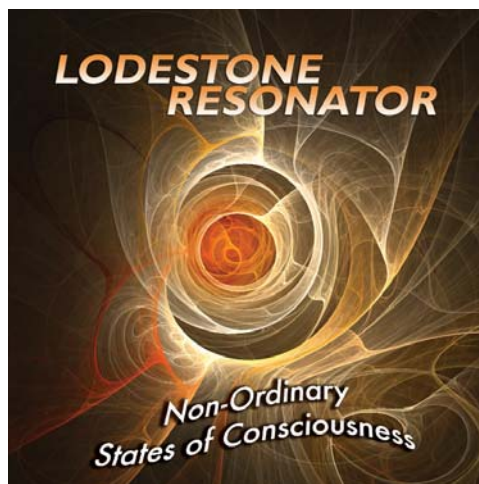

NON-ORDINARY STATES OF CONSCIOUSNESS

LODESTONE RESONATOR

X305 CD \$15.98

Experience an aural vision quest and journey beyond form where deeply satisfying sound shapes, loops and beats take you through the mind into pure consciousness. On Non-Ordinary States of Consciousness, David & Steve Gordon (producers of the *Billboard*-charting series *Buddha-Lounge*) have taken the path less traveled, wiring up a new resonance in ambient downtempo music mixing organic and electronic music elements in new ways that have only been hinted at until now. At times the leftfield beats propel you through the stargate and at others you are set afloat on underground pools of electronica ambience. Open the pod bay doors, climb in and hit the button for the unfathomable – you are propelled deep into psychedelic trance as you sail through clouds of electronic ambience into pulsating trip hop grooves of radiant beauty. Once you glide along these sonic pulsars into a new level of being, you won't even think about coming back.

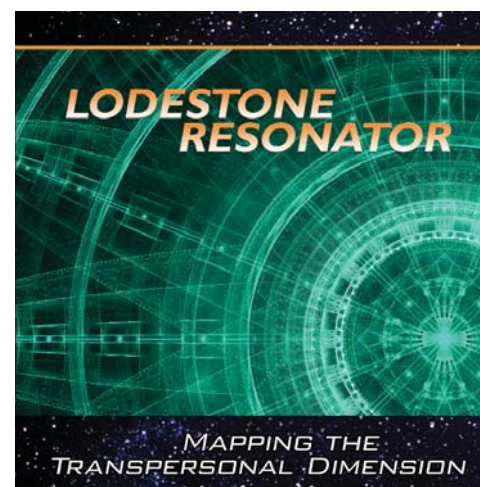

About Psychedelic Trance

Embark on a virtual vision quest to uncharted realms of the mind. You could also call this experimental music because it is music that is beyond any established forms or definitions. Sometimes called psybient, ambient psy, psychill, ambient trance, psy-trance, goa trance, left field, IDM (intelligent dance music), suomisaundi, ambient trance or just ambient electronic music or ambient techno music, this truly is the music of consciousness. Unlike chill-out electronica or trip hop music, which is designed to relax and unwind to, psychedelic trance might do that sometimes, but at other times it could also stimulate your mind and challenge your conceptions and ideas. It's music that expands the mind and can take you deep inside of yourself or send you off into furthest space.

Psychedelic trance music can have much in common with other forms of electronic music such as hypnotic patterns and loops along with dance rhythms and shifting textures and grooves but the goal is not just chilling out. Inspired by electronic music groups such as Hallucinogen, Psychonauts, The Orb, Aphex Twin, Shpongle, Entheogenic, Shulman, Ott and Third Ear Audio, psychedelic trance music has no set rules other than the essential psycho-active effect of the music itself. Musicians are free to create completely unique sounds, samples and songs that incorporate styles taken from many other genres of music as they are combined in totally new ways.

In some ways it is similar to Shamanic music that ancient Shamans would use during their medicine journeys because those journeys were not always completely comfortable for the seeker, but they always led to the truth. But at the same time, psychedelic trance music is always enjoyable because it's created in the spirit or pure entertainment for the soul. It will take you into a colorful universe beyond time and space where you can contemplate the unknowable. Since there are mysteries that are unfathomable, it's only fitting that there should be some music to accompany you on that journey.

MAPPING THE TRANSPERSONAL DIMENSION

LODESTONE RESONATOR

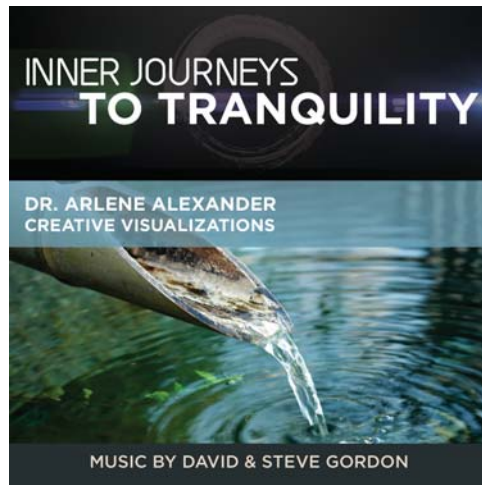

X306 CD/DVD \$15.98

Explore the realms beyond thought, where pulsating energy from the distant stars can be heard as the mesmerizing analog and digital sound wave patterns of Lodestone Resonator. Inspired by leftfield IDM and ambient downtempo groups such as Hallucinogen, Psychonauts and Aphex Twin, producers David & Steve Gordon (creators of the *Billboard* charting chill-out lounge series *Buddha-Lounge*) have discovered a new realm of experimental ambient music groove that combines acoustic and electronic sounds in ways that will expand your mind and satisfy your soul. This is the next generation in downtempo psychedelic trance where trip hop electronica enters an entirely new vibration made for deep mind explorers. Let go of linear thought and float your mind in the non stop sound-stream of these liquid loops and pools of ambience. There is no need to hold on anymore – you are gliding free into new states of being – straight into the core of consciousness where the sound and the listener are one.
